NGate: AI-Assisted Procurement & Inventory.

By Team 505 Server Error.

The SME Problem

The Hidden Cost of Manual Procurement

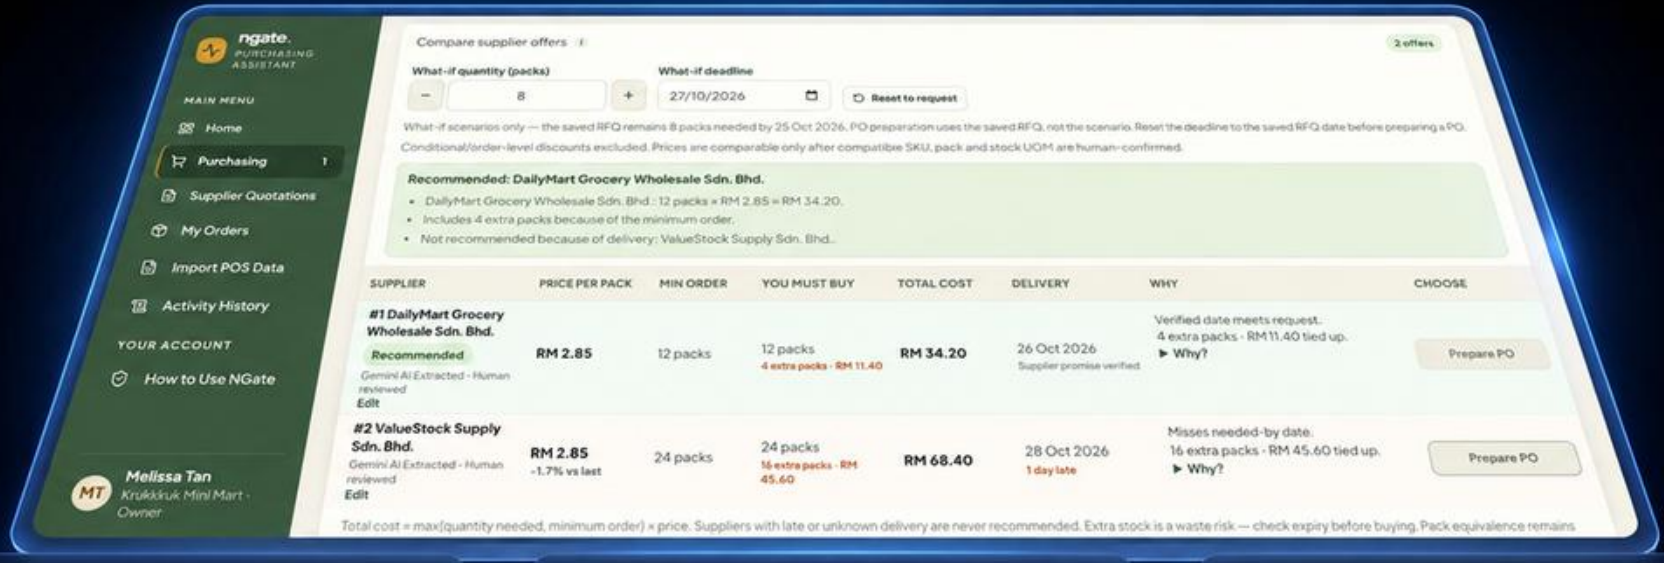

Unnoticed Markups: Silent supplier price hikes destroying profit margins.

Capital Inefficiency: Poor tracking leading to dead stock and tied-up cash.

Operational Drag: Hours wasted cross-checking manual quotes and spreadsheets.

The NGate Solution

Smarter Decisions, Powered by AI

Centralized Dashboard:
Real-time visibility into inventory and procurement health.

AI Integration:
Automated extraction of messy PDF/Image quotations.

Data-Driven Actions:
Smart supplier comparison without the manual math.

The 5-Stage Intelligent Procurement Workflow

Commercial Validation & Pricing

🎯 **95% Accuracy:** Instantly detects hidden supplier markups and price anomalies.

RM 99

🕒 **30% Time Saved:** Eliminates manual spreadsheet data entry.

🔥 Only RM 99 / Month

💰 **5% Cost Saved:** The software literally pays for itself in Week 1!

The Technology Behind NGate

Built for Scale, Speed, and Security.

User Interface (React + Vite)

A highly responsive dashboard for smooth, real-time user experience.

Smart AI Backend (Express & Python Flask)

Handles complex data routing and executes System AI tasks seamlessly.

Secure Cloud Storage (Replit Cloud + PostgreSQL):

Enterprise-grade data protection with secure OpenID login.

Sustainable Impact (SDGs)

Empowering Sustainable Economic Growth

📈 **SDG 8 (Decent Work & Economic Growth):** Upgrading SME infrastructure with AI to achieve higher operational efficiency.

♻️ **SDG 9 (Industry, Innovation & Infrastructure):** Reducing physical waste and optimizing supply chain resources for micro-retailers.

The future of SME retail is here.
Ready to Redefine SME Procurement.
